

PICK UP/TAKE HOME PUPPY REMINDERS

*72 hour Well Puppy Check (send breeder report).

*No new shots until 12 weeks

*No public dog places until after 18 weeks. (dog parks, groomers, pet stores, ect.)

*Remember to follow breeder required layout for shots.

*Puppies need to "graze" all day for at least another 2 months. Keep food down for puppy always.

*Hypoglycemia, or low blood sugar can be deadly to your puppy. It is a problem that affects many toy breeds usually between the age of 5-20 weeks. The best preventative is grazing and nutra drops.

*Puppies are babies - they need several naps during the day. Too long of playtimes can also cause hypoglycemia. When they wake up is a good opportunity for potty training.

*If you desire to change food, do so slowly.

And - I AM ALWAYS HERE!
